GitHub Portfolio LinkedIn

Senior QA Analyst with 3+ years of experience and a developer's mindset. I specialize in comprehensive quality strategies across the entire software development lifecycle, with a focus on technical leadership and process optimization . Passionate about mentoring teams, sharing knowledge, and providing qualitative feedback to bridge the gap between design and engineering, believing that the best quality comes from a team that learns and adapts together.

WORK EXPERIENCE

Quality Analyst
Electronic Arts - Nov 2024 - May 2022

- **Team Leadership & Coordination:** Lead the allocation of test cases and task distribution, strategically aligning assignments with team members' technical strengths to optimize testing coverage.
- **Process Centralization:** Spearheaded the creation of a centralized knowledge base, including video tutorials and technical documentation, improving team onboarding efficiency and standardizing internal workflows.
- **Technical Mentorship:** Design and execute training programs for peers on bug reporting, product documentation, and environment setup, fostering a culture of continuous learning.
- **Strategic Triage**: Manage the initial Triage process in JIRA, focusing on defect isolation and historical analysis to facilitate efficient decision-making by Leads and Producers.
- **Environment Governance**: Support the technical orchestration of large-scale playtesting, managing DevKits (PS5, Switch, PS4) and LAN deployments to mirror production environments.
- **Live Operations:** Validate server stability, microtransactions, and post-deployment game states under high-pressure scenarios for AAA titles.

Web Developer
LaLicorera.com – Aug 2022 to Aug 2023

- **Backend Development & API Design:** Developed and validated RESTful endpoints using PHP (Laravel) to ensure efficient communication between the frontend and backend.
- **Unit Testing:** Performed unit testing for API endpoints, verifying data integrity, response schemas, and execution times to ensure system stability.
- **API Documentation:** Documented and tested endpoints in **Postman**, centralizing technical information and facilitating project progress tracking.
- **Internal Tools & UI/UX:** Adjusted design and functionality for both the main e-commerce platform and internal tools, applying **UI/UX principles** to optimize business operations.
- **Tech Stack Transition:** Demonstrated technical flexibility by successfully transitioning from **React** to **Vue.js and PHP**, maintaining the team's delivery pace.

EDUCATION

- **Software Engineering - Present**
  Universidad de Cundinamarca
- **Technologist Degree in Systems Development - 2022**
  SENA – Servicio Nacional de Aprendizaje
- **Technical Degree in Software Programming - 2019**
  SENA – Servicio Nacional de Aprendizaje

CERTIFICATIONS, SKILLS

Certifications

- Programming with Emphasis on Mobile App Development – Universidad de Antioquia (800 hrs)
- Programming Skills – Universidad de Antioquia (800 hrs)
- Design UX/UI – Universidad Nacional (400 hrs)

Technologies:

- JavaScript, JIRA, TestRail, Confluence, ISTQB Candidate, End-to-End, Playwright, DevKits,, PHP, Postman, Scrum, Kanban
- English (Fluent) / Spanish (Native)

Skills: creativity, attention to details, critical thinking, feedback exchange, team coordination, knowledge sharing, problem solving, technical mentoring, defect triage
